

Supabase Tables

- Misaligned directory > category > type (profiles) some profiles are linked to wrong Directory. Pattern: User > Directory > join with Profile > category, type, subtype Array
- Please reference the attached document (IEP_Current_System_Schema2) for changes to DB Tables that should align with Table > (joined) profile > category > type > sub-types. May require restoring a backup version first. The developer used an AI generator to make changes to the DB resulting in misalignment.

Sidebar Theme changes

- ☐ Celebration: Category(s) are Holiday and Personal > each has dropdown menu selection. Pattern = category > type > subtype
- ☐ Dining > category > Buffet loads sub-types from Marketplace.
- ☐ Health and Wellness > type loads mixed types from Sporting types
- ☐ Marketplace > category types missing sub-tasks, listed in Meetup > type > sub-types
- ☐ Meetup > category type mixed with Marketplace types and sub-types. Remove food, artisans, vendors and vintage types
- ☐ Theme category **labels**: 1) Recommend = Celebration, Dining and Festival. 2) Coming Soon = Retreat, Reunion, Special Events and Wedding. 3) All other categories remain **unlabeled** (available in starter and pro versions > process as Recommend but not labeled)

Sidebar Venue changes

- ☐ Venue Directory > Vineyard/Winery is empty

Project Management/Manage Event

- ☐ Save Task Assignment > Response 'Something went wrong' also no exit from page.

Other Issues

- ☐ Sidebar Resources location search contains only MD test data. Should contain updated data for DC, MD, VA, NJ, PA, NYC, MA, IL, GA and FL
Test resources search by State, City or zip code
- ☐ Communication/Team 'error fetching Users' requires fix
- ☐ Please remove any date (year) restrictions when an Event can be created.
