

1. “ Sign in or Sign up” when to link an User to “Continue - Manage Event page” or use “Communication/Team - Create Event” connection:

Currently the User “Continues” automatically to the “manage event” page after signing in. This is true for returning Users - who have a User ID and who have created or in the process of completing an Event. However, the “Communication/Team - Create Event” link should be used instead: When this is a New User/creating a “User Id” then the link should be to - “Communication/Team - Create Event/Theme” connection: to start using the App.

2. Website Marketing Page > Restore + Changes + Demo

Previous changes have resulted in Website marketing pages missing key attributes and CTA. The header contains Features and Pricing that should link to Features and Pricing sections on the page. The features are missing among other issues. Requires a chat with developer.

Website Landing Page

**** Comment: Please change

- 1) “free trial for planners” to “free Starter Plan for Event Planners”
- 2) ‘start your free account’ to ‘Try free Starter Plan’
- 3) ‘create your free account now’ to ‘Try free Starter Plan’
- 4) ‘start your free trial’ to ‘Try free Starter Plan’
- 5) Remove upgrade anytime - No Risk
- 6) Restore Website Marketing dashboard below: (requirement pdf) *****

3. Other UI/UX Changes -

Validation required first. Inspect GitHub Repo “push” **frostwebdev-dotcom** contents. After validating the status of contents, remove **frostwebdev-dotcom**.

- Theme > Directory > category > type
Restore Dining > category (contemporary, buffet and fine dining) with drop down menu selection types
- Misaligned directory > category > type (profiles) some profiles are linked to wrong Directory
- “Special Events” require (Directory > category > type Configuration.
- Change ‘Special Event/Charity’ to ‘Special Event/Convention
- Remove ‘Special Event/Social Meetup and menu
- Restore ‘ ‘Special Event/Heritage” with drop down menu

Sidebar changes

- 1) Communication/Team
 - Add Invite and Permission Levels
 - Add Task Assignment (Role)
 - Navigate to Theme (create event)
- 2) Implement Marketing Campaign (requirements pdf)

Manage Event

- Remove ‘Venue booking transaction’ completed
- Remove ‘Entertainment types and menu selection
- Remove ‘External Vendor types and menu selection
- Add + Add Task Assignment same (Form used in Project Management)
- Add “back to top” button on page
- Verify that the lower part of the page has “event theme, category, type, venue location etc. removed. This is a Create Event function

Project Management

- Collaborator
 1. Remove ‘Role Management/Permission Levels’ ‘Guidelines, Permission groups’.

Role management and Permission levels are maintained in Communication/Team

2. Remove (ADD) + Assign Task to and collaborator checklist.

Task assignments are created in PM/Task/Assignment with a checklist and posted here automatically.

3. Move up 'Assigned Tasks' (from Task tab) on page layout.
4. Move up 'Create change request' from bottom of page to align after 'Task Assignment'

Add Task Assignment/Collaborator Changes

- Dependencies are missing. All dependencies based on task category/type are listed in the Business Rules. They are important because there is an order that must be followed to have a successful event. This is not optional. The current + Add task dependencies has information for Change Request
